

JNIOR—The Most Flexible Central Automation Controller for Digital Presentation

JNIOR Control Panel—
user configurable for
status and control
(optional)

Central Controller with:
12 low voltage relays
4 low voltage inputs
1 Ethernet Port
2 Serial Ports
1 Expansion Port

Built-in JNIOR Web page for
control and configuration

INTEG Event Manager—to
monitor and control ALL your
JNIORs from anywhere

Two different
JNIOR models
with different
IO mixes

4 high voltage relays
120-240 VAC @ 10 amps

Add analog control
for lighting dimmers
and LED lights

Add control for
LED strip lights

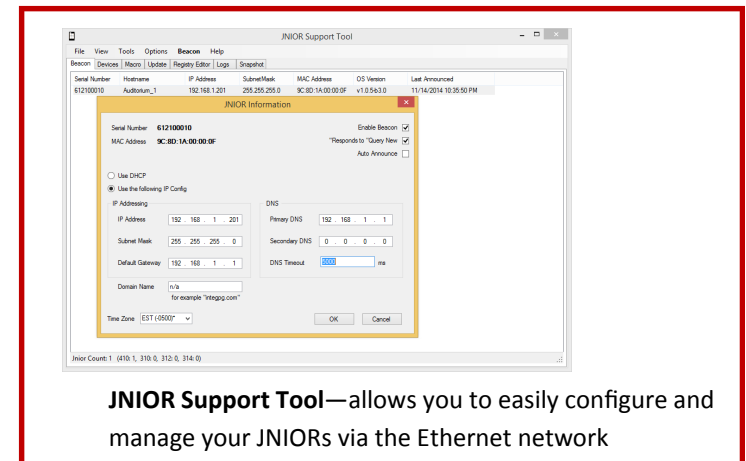

Apps can interact with the
JNIOR via wireless networks

Works with all the major digital cinema projectors, IMBs, cinema servers,
sound processors, scalars and any other Ethernet or serial device!

True Flexibility! If you need a feature we don't have, contact us to discuss.

JNIOR Support Tool—allows you to easily configure and
manage your JNIORs via the Ethernet network
