

# JNIOR Support Tool

## For JNIOR Set-Up and Management

The JNIOR Support Tool is an application that runs on a Windows-based PC that helps the user manage their JNIORs and applications. It allows the users to configure their JNIOR IP settings, update or add JNIOR software, review JNIOR logs and back-up files from the JNIOR.

The JNIOR Support Tool also has special features to help users of the Cinema.JNIOR software application to configure devices and macros. Cinema.JNIOR is a software program that runs on the JNIOR to provide central control functionality for a theater implementing a digital cinema system.

Please see the JNIOR Support Tool Manual and Cinema.JNIOR Manual for more details.
